# Dine booking page

Your challenge is to build the following page and make it look as close to the design as possible (desktop and mobile).

You have **3.5 hours** to complete this challenge.

Please submit your solution by uploading the code to Github and publishing the site to Github, fill out this form with your Github and Github Pages links.

Your Task

- Start from a new React project.
- Use the assets provided in the 'starter-code' folder.
- Plan your components and your styling for best reusability, use SCSS.
- Build a responsive page
- Use React, no need for state management.
- 'A few highlights…' section:
  - Make this section pixel perfect.
  - Render the three items from a list.

Make the following section pixel perfect:
